Continuous and Comprehensive Evaluation

Continuous evaluation helps in bringing awareness of the achievement to the child, teachers and parents from time to time. They can look into the probable cause of the fall in achievement if any, and may take remedial measures of instruction in which more emphasis is required. Many times, because of some personal reasons, family problems or adjustment problems, the students start neglecting their studies, resulting in sudden fall in their achievement. If the teacher, student and parents do not come to know about this sudden fall in the achievement and the neglect in studies by the student continues for a longer period then it will result in poor achievement and a permanent deficiency in learning for the student. The major emphasis of CCE is on the continuous growth of students ensuring their intellectual, emotional, physical, cultural and social development and therefore will not be merely limited to assessment of learner's attainments. It uses assessment as a means of motivating learners in further programmes to provide information for arranging feedback and follow up work to improve upon the learning in the classroom.
