Introduction

Security, just a word has a great sense in the context of a nation. Issue of security is the basic requirement for all human being but national security is the primary duty & responsibility of all countrymen. The problem of internal or external security can't be treated as a mere law and order problem or anything else, it have a bigger dimension and should be recognized as such but the thinking about national security issues have been, by and largely confined solely to the relevant government department and various security and intelligence agencies. On the other hand, in many countries these issues are treated as vice versa.

Number of factors conditions the National Security of a State and it is difficult to ascertain which of the two threats-external or internal - will pose greater security threat to the country going forward. If we consider a nation as an organism, to fight an external adversary, internal insurgency successfully is a greater and immediate challenge than fighting wars abroad. The internal cohesion with the people support is the basic requisite for the external defense preparedness with which a nation can deter a potential aggressor to preserve freedom. The history of the world has shown thought

millennia, that the freedom and riches were lost by neglecting the boundaries or through internal factionalism.
